NAFIS HOSSAIN

Full-Stack Software Engineer

Rajshahi - 6270, Bangladesh • nafishoss04@gmail.com

SUMMARY

Full-stack software engineer with 6+ years of experience turning business problems into reliable production software for US-based companies, from a B2B SaaS marketplace that grew to thousands of users to card payments on a point-of-sale platform. Owns codebases end to end and leads small teams; now open to committing that ownership full-time and to go deep on a company's mission for the long term.

PROFESSIONAL EXPERIENCE

BREVONIC LLC

Remote, United States

Founder and Lead Engineer - Full-time

2025 - Present

- Gave US-based companies one accountable engineering partner, from scoping and architecture to delivery and production support, by running a product engineering studio and managing a team of engineers and contractors; now open to moving from client work into a full-time role on a team.

B2B SaaS Marketplace - Lead Engineer

- Gave buyers and sellers a confidential place to list and negotiate deals, growing to thousands of users, by architecting and owning a multi-tenant B2B SaaS marketplace end-to-end.
- Kept sensitive deal information visible only to the right parties by designing role-based access control, confidential listings, secure document uploads and admin approval workflows.
- Let buyers and sellers find and negotiate deals in one place through dashboards, listing search and filters, buyer-seller messaging and public profiles.
- Kept SMS notifications compliant with US carrier rules and reliably delivered by integrating Twilio with proper A2P 10DLC carrier registration.
- Shipped the platform from first build to launch and supported it in production, partnering directly with the founder on what to build and in what order.

LaunchPOS - Full-Stack Engineer

- Let merchants accept card payments in person by engineering custom payment processing and card-terminal integration for a point-of-sale platform, alongside AI features and cloud deployment.

FreshQuote - Full-Stack Engineer

- Brought an unfinished B2B marketplace to feature-complete by ramping up on the inherited codebase and building the remaining features within its existing architecture.

WIDE OPEN TECHNOLOGIES

Wilmington, NC, United States

Lead Software Engineer - Full-time, Remote

2022 - 2025

- Cut API response times by 38% for a B2B enterprise client by designing secure, scalable APIs.
- Streamlined a client's core business processes by leading the development of a custom ERP system.
- Gave a client one platform for daily event operations and attendee interaction by building an event management system.
